Education

Thapathali Campus

Bachelor of Electronics, Communication and Information Engineering

May 2021 – May 2025

Kathmandu, Nepal

Experience

Mobile Engineer

Kathmandu Living Labs

Apr 2025 – Apr 2026

Kathmandu, Nepal

- Engineered core application features for the Baato Maps Android app, implementing robust navigation, search, and real-time location data visualization.
- Leveraged the MapLibre SDK to build and optimize the primary mapping interface, enhancing map rendering performance and delivering a smooth, responsive user experience.
- Actively maintained and polished the application codebase by identifying and resolving bugs, reducing crash rate by 30% in key user flows, refactoring components for improved scalability, and implementing enhancements to increase overall app stability and performance.

Android Developer Intern

Uncle Sam's Technologies

Aug 2024 – Sept 2024

Remote

- Integrated Stripe Android SDK to implement a seamless and secure payment flow in the Billings App.
- Built a WebView component enabling smooth integration of external web content inside the application.
- Gained hands-on experience with Ktor for backend service development and API integration.

Projects

Driving License Exam Nepal | Kotlin, Jetpack Compose, Material 3 | 🐙 ▶

Feb 2025

- Developed an offline-first Android application using Kotlin and Jetpack Compose for an optimized user experience.
- Designed a clean and intuitive UI using Material Design 3.
- Implemented Compose Navigation for seamless transitions between screens.
- Achieved over 100 downloads with an average user rating of 5 stars on the Google Play Store.

Quizzle | Kotlin, Room, Retrofit, Koin, Coroutines | 🐙

Nov 2024

- Built a quiz app with offline storage via Room Database and progress tracking.
- Integrated Retrofit for API-based question fetching with Coroutines for async operations.
- Used Koin for lightweight dependency injection improving modularity.
- Designed a clean UI using Material Design 3.

Trackify | Kotlin, Room | 🐙

Jun 2024

- Developed a daily task planner app designed to help users increase productivity with an easy-to-use interface and features like a pomodoro timer, users can easily organize and achieve their daily plans.
- Integrated Room database for local data storage that performs CRUD operations.
- Implemented Kotlin Coroutines for asynchronous programming and Dagger Hilt for dependency injection.

Technical Skills

Languages: Kotlin, Java, C++, SQL, Python

Android: Android SDK, MapLibre SDK, Firebase, Jetpack Compose, MVVM Architecture, Coroutines & Flows, Room, Retrofit, Hilt

Developer Tools: Android Studio, Git, GitHub, Figma, Postman, VS Code

Leadership / Extracurricular

Hackathon Winner

Dristi 3.0 Hackathon

Jan 2025

Kathmandu Engineering College

- Developed an Android application teaching Nepali language, culture, and folklore to NRN children, improving cultural awareness.

Leo Club of Kathmandu-Aarambha Deurali

Secretary

Spring 2024 – Spring 2025

Lions Club

- Organized a blood donation program at Thapathali Campus with 120+ donors.
- Organized monthly cleanliness programs, hunger relief program and built a library in school.
